- Suitable for ALU lamination, printable in Flexo and Roto.
- Ideal for small bags, fast food wraps, butter wrap, ice cream, cakes, fat food wrapping in general.
- Suitable for food contacts as per the EC and FDA legislations

## ONE SIDE GREASE RESISTANT

| Properties     | Method      | Unit             | Values    |           |           |           |
|----------------|-------------|------------------|-----------|-----------|-----------|-----------|
| PAPER          | ISO 536     | g/m <sup>2</sup> | <b>28</b> | <b>30</b> | <b>45</b> | <b>60</b> |
| Thickness      | ISO 534     | my               | 31        | 34        | 46        | 64        |
| Kit Test value | TAPPI T 559 | -                | <b>7</b>  |           |           |           |
| Whitiness      | TAPPI 525   | %                | 82        | 82        | 84        | 84        |

- High-performance greaseproof treated papers for fatty products such as pastries or fast food.
- The high grease resistance is particularly appreciated as inner ply for pet-food bags.
- Suitable for Flexo printing and lamination with adhesive or ldpe.
- Greaseproof treatment on one side.
- It is a greaseproof treated paper well adapted for fast food application, like butter wrapping, biscuits wrapping, and burgers wrappers.
- Suitable for food contacts as per the EC and FDA legislations
